

MICROPORE

Particles

UNIFORM (MONOSIZED) PARTICLES

Micropore Technologies contract particle supply:

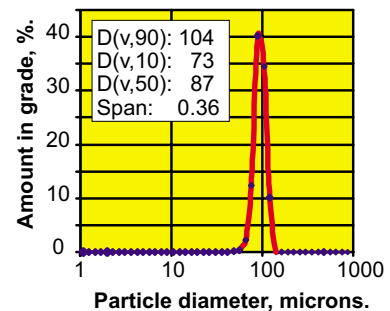

- Emulsion and suspension polymerisation
- PLGA, PVA, PVP, PS/DVB, pectin, etc.
- Contract research for product formulation
- Extensive Particle Technology expertise
(see: www.particles.org.uk)

Monosized 60 micron drops then polymerised to particles

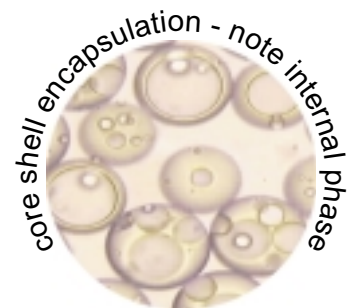

DIAGNOSTICS AND ANALYTICAL

- Calibration and test particles
- <1 g to 10's kg production
- Certified size distributions
- Functional and precursor particles
- From modes at 400 μ m downwards

ENCAPSULATED

- Encapsulation of liquids and solid particles
- Production of double emulsions with shell solidification
- Contract product formulation
